Healthcare

We at Sheehan Phinney believe that healthcare providers deserve a law firm that combines state-of-the-art knowledge of federal and state regulations with wise and seasoned counseling that can only be gained from decades of practice. Our Healthcare Practice Group enjoys the distinction of having served for years as day-to-day counsel to hospitals, long-term care facilities, CCRC's, home health care and hospice organizations, Federal Qualified Health Centers, drug and alcohol treatment facilities, physician and dental practices, and individual practitioners. We advise these clients on their full scope of healthcare needs including licensure, corporate governance, regulatory compliance, financing, tax exemption, employment and contract issues, mergers and acquisitions, joint ventures, billing compliance, fraud and abuse investigations, drug testing and diversion investigations, bylaws and policies, privileging and credentialing, and disciplinary actions before professional boards. Our clients also tap our years of experience for advice on patient care issues including HIPAA, HITECH, EMTALA, medical records, privacy and security, consent to treatment, and mandatory reporting.

Our Healthcare Practice Group strives to be proactive by alerting our clients in advance to expected changes in federal and state laws and regulations so that they will be ahead of the curve in preparing for and managing such challenges. We offer educational sessions to our clients to assist them in complying with existing and new laws (e.g., HIPAA training, advance directives training, etc.). We also provide a full range of risk management and litigation services in the federal and state courts, in alternative dispute resolution settings, and before administrative tribunals.

Institutional Clients – Representative Matters

- Serve as general and special counsel to hospitals on issues such as Medical Staff Bylaws and policies, credentialing and peer review, and Quality Improvement matters
- Assist long-term care facilities with licensure, record keeping, contracting, collection, and admission agreement drafting
- Represent Federally Qualified Health Centers on regulatory compliance issues
- Draft employment contracts and separation agreements and advise on the full range of employment issues including impaired practitioners, drug diversion, and other misconduct
- Represent Medicare and Medicaid providers in government fraud and abuse investigations, repayment determinations and settlements, and self-reporting matters
- Represent not-for-profit organizations before the NH Charitable
